PAPSTAR pure

Un nome - una garanzia!

Il marchio **PAPSTAR pure** è conosciuto per le stoviglie monouso e gli imballaggi alimentari ottenuti da materie prime rinnovabili nella loro forma più naturale. **PAPSTAR pure** significa: nessun materiale composto, nessun rivestimento o stampa intensiva.

Un prodotto – un materiale!

PAPSTAR promuove il principio della neutralità climatica

I primi prodotti a impatto climatico zero nell'ampio portafoglio di prodotti **PAPSTAR** sono i piatti di carta rotondi e quadrati della gamma "Pure" realizzati con cartone in pura fibra di cellulosa certificata FSC® (Forest Stewardship Council).

I più importanti sigilli e certificati di qualità

I nostri prodotti e le nostre gamme sono al centro della nostra visione generale per la sostenibilità. Riteniamo che gli aspetti ambientali e sociali siano ugualmente importanti per i nostri elevati standard di qualità. Nella selezione dei prodotti e nella produzione, siamo guidati dai sigilli di qualità che danno un messaggio chiaro. Non solo diamo la preferenza agli articoli che portano sigilli di qualità da autorità indipendenti e/o istituti di certificazione, ma garantiamo anche attivamente la certificazione e il monitoraggio continuo dei nostri prodotti.

Il **Forest Stewardship Council Germany (FSC®)** si è posto l'obiettivo di gestire le foreste del mondo in modo ambientalmente appropriato, socialmente compatibile e sostenibile. L'FSC® ha stabilito i principi di base uniformi in tutto il mondo per una gestione forestale responsabile. L'etichetta FSC® significa che i materiali utilizzati per il prodotto sono stati acquistati in modo responsabile. Cerca i prodotti certificati FSC® in questa brochure.

Si prega di prestare attenzione ai prodotti certificati FSC® in questa brochure.

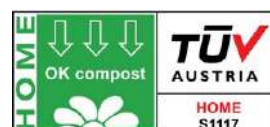

La **ISO 14001** è la norma che stabilisce i criteri per l'impostazione, l'introduzione, il monitoraggio e l'ulteriore sviluppo dei sistemi di gestione ambientale. Il suo obiettivo principale è allineare la protezione dell'ambiente e la prevenzione dell'inquinamento ambientale alle esigenze economiche, sociali e politiche.

La norma europea per i materiali compostabili è la **DIN EN 13432 (piantina)**. Durante un adeguato compostaggio industriale, oltre il 90% del prodotto si biodegrada dopo 80 giorni. Dopo sei mesi, anche le particelle più piccole (sotto i 2 mm) sono state completamente metabolizzate.

Il logo **OK compost HOME** sviluppato dal Gruppo TÜV Austria garantisce il processo di degradazione biologica dei prodotti nel compostaggio domestico.
