DISPOSABLE PRODUCTS MADE OF RENEWABLE RAW MATERIALS

*pure*

## WOOD AND VIRGIN FIBRE CARDBOARD

Wood grows back, is environmentally friendly and biodegradable; products made of wood and cardboard are 100% approved for direct contact with dry, moist and fatty foods. Unlike recycled material, virgin fibre guarantees that no harmful substances, such as those from waste paper processing, can pass into the food. Only wood from sustainable, FSC®-certified forestry is used.

page 4

## BAMBOO

Bamboo is a raw material that grows back very quickly, is extremely environmentally friendly, yet tasteless, and is naturally antibacterial/antimicrobial and hypoallergenic. Further advantages of tableware or cutlery made of bamboo are their stability and natural look. This puristic production (rolled and shaped) takes place without the use of chemical additives like melamine resin or dyes.

page 18

## SUGAR CANE

Sugar cane is primarily used to produce sugar. The sugar juice is pressed out of the cane. The fibrous part, the bagasse, is left over as a by-product and can be used to shape stylish and stable plates, trays and menu boxes. These sustainable products are suitable for microwaves and are biodegradable. Sugar cane is a raw material that can be harvested up to three times a year and is obtained from an environmentally optimised supply chain.

page 20

## AGRICULTURAL RESIDUES

The underlying approach already in use for products made from sugar cane or palm leaf, namely to make good use of accumulating and decaying plant residues, is also applied to agricultural residues. The plant residues from agricultural production are dried in the sun, ground and then processed in their self-binding fibre form into a pulp which is then sprayed into moulds and dried. This is how bio-based packaging and strong disposable tableware is obtained.

page 23

## CORN-(STARCH)

In visually, haptic and function terms, bioplastic products can hardly be distinguished from normal plastic articles. Cold drink cups or packaging cups made of PLA (polylactide) or cups and soup bowls made of CPLA (crystallised polylactide, each based on corn starch) are fully biodegradable or - even better - recyclable. Intensive research is constantly resulting in process technologies being optimised.

page 24

## PALM LEAVES

Biodegradable and compostable recycled palm leaf tableware is made from the leaves of the areca palm tree. The tree has huge palm fronds with leaves that it sheds naturally every few weeks. These are cleaned and dried in the sun. Under heat, they are pressed into plates and trays in a special process that make them microwave-safe. The individual surface structure makes each item unique.

page 25

## RETAIL: Disposable tableware for home

A range of high-quality disposable products in small sales units.

## „PURE“ PRODUCT LINE

The „pure“ product line at **PAPSTAR** stands for innovative disposable and recyclable tableware made from pure mono-material. This means no compounds, coatings or intensive printing are used.

*pure*

**One product - one raw material, for complete biodegradability.**

## PAPSTAR PUSHES THE PRINCIPLE OF CLIMATE NEUTRALITY

The first climate-neutral products in the extensive **PAPSTAR** product portfolio are round and square paper plates from the „pure“ range made from FSC®-certified virgin fibre cardboard.

## FOCUS ON QUALITY

**PAPSTAR**-product ranges comprise the key focus of the company's overall journey towards sustainability. On this path, both environmental and social aspects are taken into consideration as well as high quality requirements. When selecting products and during production, the company aligns itself with quality seals from independent bodies. Awards like the GREEN BRANDS quality label or inclusion in the select circle of the „Great German Brands of the Century“ confirm the company's own aspiration and, together with a comprehensive corporate communication concept, enhance the brand profile.

### FSC®

The **Forest Stewardship Council Germany (FSC®)** has set itself the goal of managing the world's forests in an environmentally appropriate, socially compatible and sustainable manner. The **FSC®** has set out worldwide, uniform basic principles for responsible forest management. The **FSC®** label means that materials used for the product have been responsibly sourced.

The mark of  
responsible forestry

*Please pay attention to  
FSC®-certified products  
in this brochure.*

## GREEN BRAND

**PAPSTAR** has been awarded the title „GREEN BRAND“ (Germany and Austria) for its responsibility towards people, nature and the environment. This international quality seal is awarded to brands and companies after a nomination and a multi-stage assessment procedure, that demonstrably show a high level of commitment to the environment, sustainability and ecological living and production conditions, and that live, breathe and communicate this transparently to their customers and employees alike.
