# Snacktrays

**made of FSC®-certified fresh-fibre cardboard with Notpla-coating**  
**- 100 % plastic-free food packaging -**

Notpla (= Not Plastic) stands for a plastic-free coating based on seaweed which is one of the most rapidly renewable raw materials. This allows food packaging made of cardboard to be made resistant to water and oil without using a plastic coating.

**Art. no. 97052**

## ABOUT US

The PAPSTAR product range is made up of over 5000 consumables from around 200 productions in the categories disposable tableware, service packaging, table settings and household & hygiene. Besides the systematic and consequent use of renewable raw materials, the company is also devoting itself more and more to sustainable solutions in terms of cyclical material flow management.

For example, food scraps and bio-wastes of plant origin or disposable tableware and napkins made from renewable raw materials can be transformed into a new secondary raw material in a fibre-recovery treatment process. This new secondary raw material can, for example, be recycled for the production of industrial cardboard.

Europe-wide logistics and service concepts ensure the permanent supply availability of the entire product range.
